Data Sheet – Rear LED Rain Light

Developed for international and national motorsport the Lifeline LED Rain Light unit is homologated for competition use by the MSA and FIA.

Specifically designed to meet the extreme demands of international motorsport the Lifeline LED Rain Light has been subjected to rigorous vibration testing and is completely waterproof.

Light output significantly exceeds minimum requirements while retaining low power consumption. The circuit design includes multiple parallel paths so that in the event of LED element failure the light unit remains operational and compliant. Simple and uncomplicated design ensures low maintenance and ease of fitment.

Lifeline's reputation for attention to detail ensures the best value product without compromising quality.

Fire and Safety Systems Ltd.

Champions of Safety

Specification:

Part Number:	LL421-100-001
Homologation No:	MSA/RWL/17/02
Display:	Light Emitting Diode
Number of LEDs:	60
Number of Circuits:	15
Viewing Angle:	+/- 12 degrees
Current:	300mA @ 12V
Light Output:	2700 lux / 840,000mcd
Operating Temperature:	-25 to +75°C
Housing:	Machined Tecast TM Cast Nylon
Fixing:	M6 Bolt
Dimensions:	92 x 90 x 20mm
Weight:	220g
Power supply:	External 9 to 12 Vdc
Power consumption:	100mA
