

Data Sheet – Motor Sport AFFF (Foam) Handhelds

Lifeline offers a full range of quality hand held AFFF (Foam) extinguishers to suit all budgets and motorsport applications. For use on class A, B & C fires including low voltage electrics.

Lifeline hand held extinguishers are supplied complete with a bracket and quick release strap for easy access (except for belt mount units). All units have a 2 year servicing cycle.

- **1.0litre** - Ideal for your road car, trailer, service vehicle, caravan or workshop. This extinguisher is not approved for use in motorsport.
- **1.75litre** - For national rallying, sprints/hillclimbs or pre 31/12/60 historic racing.
- **2.4litre** - For international rallying.
- **2.4litre Dumpy** - For international rallying but fitted with a flexible dip tube so it can be operated on its side or even upside down.
- **2.4litre Slimline** - As per above but with a slimline cylinder to allow greater flexibility when packaging within the confines of the modern competition vehicle.

The Lifeline range of handheld units is manufactured to the same exacting standards as in our World Championship Teams chosen systems.

Specifications				
Part No	Description	Height (mm)	Diameter (mm)	Operating Pressure (bar)
